| • Task prioritization<br>   | • Interpersonal communication<br>  |

## WORK HISTORY

**DISH WASHER** 09/2019 to 08/2020

**Cracker Barrel Restaurant**, Colorado Springs

- Washed any dish in the restaurant, from customer's dishes to pots and pans from the kitchen.
- Work was time sensitive and required focus so that all customers had clean dishes and all other employees had pots, pans, and other utensils ready for use.
- We did other tasks, such as taking out trash twice a day, cleaning the freezer, backroom, restrooms, entrance, store, and parking lot.
- We closed every night, always last to leave with the managers.
- Taught me how to focus on the task at hand, and be ready to help others during slow hours.

## EDUCATION

**Aiken Technical College**, Aiken, SC

**Associate of Applied Science**, Computer Programming, 04/2025

Learned how to develop computer software from the ground up and worked on many projects in many different languages.

Remained on the deans list and learned many key programming skills and languages, such as:

- C++
- HTML and JavaScript
- PHP
- SQL

And touched briefly on others such as:

- React
- C# and .NET
- Swift
- Python

I hope to learn much more as I begin my career in programming.

**Doherty High School**, Colorado Springs, CO  
**High School Diploma**, 05/2019

Was in the NJROTC Program at Doherty High School for three years and held a leadership position during the third. Led cadets in drill and inspections and personally participated in competitions and community/school events, as well as earned numerous ribbons and medals.

This program helped develop discipline, leadership, and strong communication skills, and gave experience leading and helping others.
